I've never played a game like this but it was definitely great. I was watching the anime and realized it was a game and switched. Great call.. This is one of the best games I have ever played.

10V10 without exaggerations.. A hybrid of the original Steins Gate VN and anime adaptation fused into one.

Personally I visually prefer this version since we can see the scenes and characters move instead of the usual still sprites with occasional CGs plus I get to see Okarin's hilarious antics in motion (not shown in original VN since it's a 1st person perspective) XD

Not to say the original didn't have its charm, it actually has more interactive choice making compared to ELITE and the artstyle is more unique.

Due to its anime hybrid format ELITE cuts out some of the fluff conversations and events that aren't important while still maintaining most of the important ones.

Highly recommend for people who aren't used to visual novels for a more visual experience that explains more than the anime version.. I enjoyed the original enough that I bought the elite version. I'm enjoying the game more with the animations. I can't get enough of time travel games, if they're really well done. This is really well done. I did think reading through a million @channel messages was a little tedious though.

Here's my review for the original:

"It may go awhile without advancing the story at certain points, but I just finished chapter 1, and no matter what else happens, I'm happy with my purchase. Memorable characters. Also I'm a sucker for time travel stories."

Some people said that GPU usage is too high or even up to 50%, but some people said that the usage is low. Why is there such a big different?

**GPU usage depends on the current GPU clock frequency. When you find that GPU usage is high, you should check current GPU clock frequency. 20181205 Update:**
